

Your INL Update — Week of Dec. 13, 2010

This is Misty Benjamin with your INL Update.

Two hundred and fifty local kids will have a little something under the tree this year to celebrate the holiday season. Employees from Idaho National Laboratory and the Idaho Cleanup Project worked together to meet the needs and wants of the children through the Salvation Army's Angel Tree program.

The season will also be brighter for more than 90 families across southeast Idaho taking part in the Christmas for Families Program. Employees and contractors from across the Site donate food, gifts, time and money to support families that are in need this season. INL contractors and members of the United Steel Workers union have participated in this program for 23 years.

You can learn how the lab is taking concepts you may recognize from remote controlled planes and testing elite unmanned vehicles. The tiny planes are able to take on huge missions in national security and environmental protection. You can see them for yourself in a narrated slide show at INL.gov.

This was your INL Update. You'll find more information at INL.gov, including community announcements and the latest INL news.
